COVID mRNA Vaccines 'Immoral and Unethical,' Berenson Tells Rogan

Journalist Alex Berenson and podcaster Joe Rogan on Wednesday discussed the long-term safety of mRNA vaccines, Big Pharma's monetary incentives and Berenson's ongoing lawsuit against Pfizer and the U.S. government.

By John-Michael Dumais

38

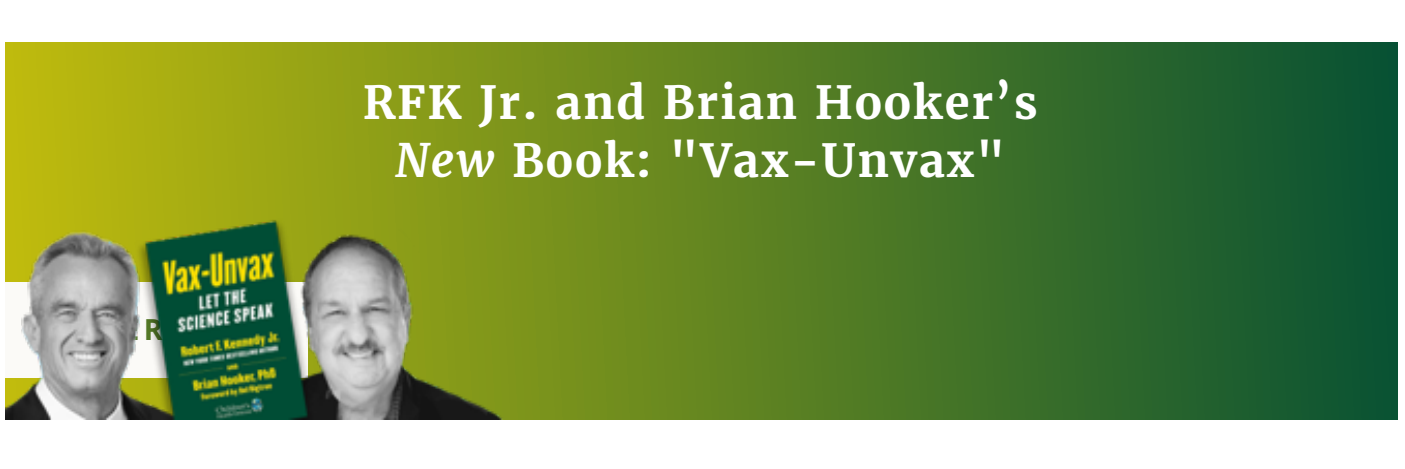
Miss a day, miss a lot. *Subscribe to The Defender's Top News of the Day.* ***It's free.***

"We do not know what the long-term effects of the mRNA vaccines are … and it is immoral and unethical to keep using those right now," according to Alex Berenson, who appeared Wednesday on "The Joe Rogan Experience" podcast.

Berenson, a former New York Times reporter and now Substack writer, is the author of 13 novels, the nonfiction book, "Pandemia: How Coronavirus Hysteria Took Over Our Government, Rights, and Lives" and the five-book series, "Unreported Truths about COVID-19 and Lockdowns."

Berenson told Rogan he believes the mRNA vaccines are a "failed product" and should be withdrawn. But, he admitted, this is unlikely to happen.

"There's far, far too much at stake for … the pharmaceutical industry and public health and the Democratic party and the media to even consider allowing that to happen," he said.



RFK Jr. and Brian Hooker's
New Book: "Vax-Unvax"

Berenson pointed to promises made by the government and pharmaceutical industry that the mRNA vaccines would revolutionize the treatment of respiratory viruses and eliminate COVID-19.

"Don't let them tell you that's not what they said, because it is what they said, OK?," Berenson said, noting they did not say, "There may be some symptom reduction. It may reduce cases of serious illness."

"No, it was 'These are so effective we're going to get to herd immunity with them and COVID is not going to be a problem ever again,'" he said. "That was just horseshit."

Berenson apologized to Rogan for bringing up the issue, telling him he didn't think a lot of people cared about it.

Rogan responded:

> "No, I think a lot of people care. I don't think it's a few people. It's just uncomfortable — all these things are so uncomfortable … that people would sell things that don't work just to make money, and they would put you at risk. But it's like, if they can, they will."

The two discussed the new Pfizer vaccine for the latest variant, noting it was tested on only 10 mice — "Not a joke," Berenson said.

Berenson talked about 5 billion doses of the mRNA vaccines having been made, and $120 billion worth sold by Pfizer and Moderna combined, by his estimate, and the fact that 2 billion of those doses were thrown away, unused.

"The companies made somewhere between $40-50 billion on a vaccine that just got tossed. … Even by American pharmaceutical standards, that's a lot of money," he said.

"It's hard to turn the spigot off," Rogan said, commenting on the continued rollout of vaccines. Berenson, finishing Rogan's sentence, added, "And it's hard to tell the truth when there's that much money."

Rogan wondered whether pharmaceutical companies could even afford to tell the truth, given their obligation to shareholders.

"If you have something and you haven't been called out for it," Rogan said, "and there seems to be enough gaslighting going on in the media, that it sort of obscures the reality of it — you're supposed to keep selling it … right?"

"If you don't look to find the problem, then you don't know, right?" Berenson said. "So you don't look — that's the game."

"Boy I wish that wasn't the game," Rogan said. "I wish the game was, 'We want to make medicine to make you feel better and if that medicine doesn't work, we try to come up with a new one — sorry!'"

Rogan reflected on how the huge amount of money going into vaccine development creates incentives to pass them through trials "regardless of whether or not it's effective."

"Before you get out of the gate … you're into this thing a billion dollars or whatever," Rogan said.

Berenson said, "That's right. And on the flip side of that, it's so profitable on a per-unit basis because it takes a few cents to make, and then you could sell it for, you know, five dollars or $50 or $500."

DONATE TODAY

Berenson reminded Rogan he was suing the government and the chief executive of Pfizer and one of its board members "all in the same suit."

"They responded with a motion to dismiss," Berenson said, arguing that Berenson had been selling merchandise off of the lawsuit.

Pointing to his self-printed tee shirt, which read "Fauci & Gottlieb & Slavitt & Bourla" — four of the defendants in his lawsuit — Berenson laughed and pushed back on Bourla's claims, saying "Listen buddy, your company made $70 billion selling the vaccines and you personally had your salary double from $18 million to $33 million — almost double — from 2020 to 2022. So don't call me the grifter, my friend."

Rogan said he thought that Pfizer CEO Albert Bourla's argument was "kind of crazy" and that the real issue is how they got Berenson kicked off Twitter.

"That's what the lawsuit's about," Berenson said.

Berenson pointed to the name "Gottlieb" on his shirt, saying that Scott Gottlieb between 2017 and 2019 was the commissioner of the U.S. Food and Drug Administration (FDA).

"He quit the FDA and three months later — exactly three months, the minimum amount of time later — he joined the Pfizer board where he's a senior board member," Berenson said.

The other two names on the shirt — and plaintiffs in Berenson's suit — are Dr. Anthony Fauci, former head of the National Institute of Allergy and Infectious Diseases, and Andy Slavitt, formerly President Biden's White House senior advisor for the COVID-19 response.

During the more than two-and-a-half-hour podcast, Berenson and Rogan discussed a number of other topics, including the real cost of pharmaceutical incentives, corruption in the medical system, ongoing COVID-19 scams, unlocking the secrets of health, gambling and aliens.

The creators of these "vaccines" were the Department of Defense. They are a bioweapon given to the drug companies to give them legitimacy. They were never fully tested because they were not meant to save lives but to destroy them.

***

Given the three branches of the U.S. government - legislative, executive and judicial - have been (despicably)100% impotent/derelict in prosecuting the unprecedented medical frauds, plus the premeditated mass murders and brutal assaults/batteries of millions of Americans, citizens are justified in renaming the branches with the (intended) derogatory, embarrassing label: "The Three Stooges".

SEPTEMBER 23, 2023 A NEW STUDY ESTIMATES THAT 17 MILLION PEOPLE HAVE BEEN KILLED BY COVID INJECTIONS SO FAR, AND THE RISK OF DEATH IS HIGHEST IN OLDER AGE GROUPS

The study quantified the fatal toxicity risk per injection and estimated that the covid vaccines have killed 17 million people worldwide. This means that the covid injections have killed 1 in 470 people – in less than 3 years.

ModRNA (modified RNA), NOT mRNA (messenger RNA).

This is the biggest crime. Pfizer talks about using modRNA in their own documents, whilst everyone keeps falsely saying it is the much safer mRNA.

People need to wake up to this already and stop calling it mRNA. That is a huge RUSE!

"Berenson told Rogan he believes the mRNA vaccines are a "failed product" and should be withdrawn. But, he admitted, this is unlikely to happen."

He's a fraud, part of the Marxist "false opposition', as identified when he uses the word "vaccine". Medical science tells us there are no vaccines yet for any cold virus, the coronavirus (and RSV) being a cold virus. Virology has been trying for over 60 years to create a cold vaccine for just one serotype (the rhinovirus has over 160 serotypes), but no luck. When a vaccine is discovered, the media will plaster the news all over the electromagnetic spectrum, not including the multiple awards given to the team that so discovers the vaccine, including, at least, a Nobel nomination. Have you seen any of this? Of course not.

Sept 2021, they Changed the Historic Definition of a Vaccine, was it done Legally?
Historical Definition, gives one "Immunity" and "Stops Transmission!"
IMO: If it does not do that it is not a Vaccine!
0 0 Reply • Share ›

Dean Jackson → GarySummers
3 days ago
"Sept 2021, they Changed the Historic Definition of a Vaccine, was it done Legally?"

Irrelevant. The FDA is not medical science, it's a procurer/messenger of medical science. This is current medical science's stance on the non-existence of vaccines, whether or not it provides immunity or stops transmission...

"A study that compiled past and present research on the development of a rhinovirus vaccine noted that:8

It will be difficult to develop the vaccine because rhinovirus infects quickly and mutates, or changes quickly.

In clinical trials that tested a cold vaccine with just one strain, results showed that it was not protective.

In clinical trials that focused on a cold vaccine with 10 strains, results also found it to be ineffective.

If a cold vaccine does get developed, it will likely need to provide broad protection against many strains of rhinovirus."

Google (the article): Why Isn't There a Vaccine for the Common Cold?

No vaccines at all, even for a mere single strain/serotype, identifying, at best, medical fraud.

The problem is the drug companies have Emergency Use Authorization for their vaccines.The vaccines were rushed into production bypassing many of the standard trials and safety studies. We must get rid of EUA status (emergency use authorization) for vaccines. Companies should not have a get out of jail free card. They should be held responsible for their product. Has EUA status ever benefited anything?

We the people can do it. There are enough people hurt by these vaccines as well as family and friends and those who refused the shot that we can rally in front of our legislatures offices all at the same time to show them that we the people don't want this.

With 36,000 deaths and over two million people reported to have been harmed according to the Vaccine Adverse Event Reporting system (VAERS) the companies would be in serious financial trouble if they had to be accountable for harm instead of 40 to 50 billion dollars in profit. The rate of death from COVID-19 shots exceeds that of more than 70 vaccines combined over the past 30 years, and it's about 500 times deadlier than the seasonal flu vaccine.

Analysis of Risk vs. Benefit shows that SARS-CoV-2 has an overall global survivability rate of 99.8 percent, which increases to 99.97 percent for people under 70. It is essentially on a par

The Boomer generation, born in the unprecedented bosom of freedom and opportunity post WWII, and the existential nighttime childhood nightmare of Russia, Russia, nuclear threat, had them hiding under desks at school. A dystopian, bipolar existence. Enter the 12" black and white TV, the first massive pathway to be. A propaganda tool so insidious called "programing". Hollywood in the 1960's, already heavily infiltrated by Communist ideology would be the gateway and keepers of ideology in the West. The coming rise of big tech in California would finish the job. Politics is indeed down stream of culture for the mass of middle America. Capture Hollywood first, then tech in the name of defending America by not defending its ideals, turning the weapon on itself, plausibly deniable because it is successful, suicide. By the early 1990's America's weak and confused Representation post Reagan, the administration officially invited the CCP's China to America's table, simultaneously assuring big tech's got this, so gut middle American manufacturing, psychologically and financially depressing the middle into dystopian crime and drugs as their jobs went to people that hate them, but tech demanded all could be programmers and get cheap junk to by to offset their losses. The Hollywood psyops continued with the top rated Hollywood series, not movies, as the Boomer matured. Call Saul, Breaking Bad, all intended to seem to represent America, the pit of deceit. The WEF (1971) would now step it up. Marxist European capture of the EU, WHO, World banking, Oligarchs, all looking to gain

Good for Berenson, he looks much better than he did two years ago when the Communists that are running America's uniparty under the Democratic Party brand tried to annihilate his life for free speech to power. They had so stressed him out by propaganda and censorship he looked thirty years older two years ago. Winning one signification lawsuit has given him life. I have seen this happen to many close to me who are courageous and wise. Yeah, I know Dems, you'll keep voting for the same brand because you were told by TV your whole life that America is a "democracy", therefore voting Democrat must be in America's interest. That your Party was hijacked when the original legitimate Vietnam war protests were hijacked must be unbelievable. That in the vacuum of the divide of America (to this day) was taken up by Marxist academia hiding in the woodwork of elite Harvard, Yale, Stanford, Columbia, Berkeley, filtering Dow through tiered colleges, high schools, and on to kitchen tables that America sucks must be a tin hat conspiracy idea that I lived through like Mr. Kennedy can't be true. YOU HEARD IT HERE FIRST. I've been trying to explain it for seven years and I get blank stares. Many Nam veterans knew this was coming six decades ago. To protest a war is obviously debatable, but that America and it's youth would allow the unprecedented slander of it's weary returning veterans, simultaneously taking credit for "the greatest generation" of the "good" war was dystopian, just like Marxism/Socialism/Communism in all forms. There's no "tweaking it". Deceit, propaganda, hijacking, ambush, and censorship are the coins of the realm. We live in a Constitutional Republic to the chagrin of democracy's free for all. The Founders told us this could happen if we lose faith. Dissent and peer review are the catalyst of science, a One Party State will always tell you "the beatings will stop when moral improves.

An Op-ed has been posted on Trial Site News titled "Immune System Evasion by Viruses and Tumors: Are We Aiming at the Wrong Target?" (https://www.trialsitenews.c.... The article is Open Access. Immune system evasion is central to tumor/cancer cell development and cancer immunotherapy, viral infection, and viral pandemics fueled by frequent viral mutations (such as the present COVID-19 pandemic). The Op-ed shows that present approaches to reducing immune system evasion are insufficient, and are missing a central component. Appendix 3 of the Op-ed contains a comprehensive listing of factors that contribute to immune system dysfunction.

There is no SV40. What they are calling simian virus is the green monkey dna from the cultures used to make the vaccines. As long as they continue to use monkey kidney cells to grow their cultures, they will continue to find monkey DNA in the vials. All of it is poison.

In answer to Christine, below:Everything now is clouded by subterfuge, we are told one thing while another is happening: If what I write below is "mumbo jumbo" then scan your body, if vaccinated, with an Android 5 phone and if your body has a new MAC address, which you can easily discover with your phone using Bluetooth to find MAC addresses around it. If you can't find yours, get someone to scan you with your Android phone.

If your body has a new injected MAC address, then it is broadcasting I am here, I am here, I am here on 5G, to a receiver somewhere and what receives can transmit, but you won't know when your thoughts are not your own, so don't worry about things you cannot change. Be interesting to see how it works at the next election and if those who vote actually have any say over who they vote for, won't it. Better write down who you want to vote for, several weeks before voting (when you mind is not being manipulated) and try to vote for the name of the person or political party, you have written on the piece of paper you have with you - nip around to your nearest Graveyard and scan the corpses in the ground - you will find they are still emitting a MAC address, those that were vaccinated before they died - we might yet see corpses emerging from the ground as if they are alive (By AI control?).

"Vaccinated People Emitting MAC Addresses; What's Causing This Phenomenon?"

The phenomenon of MAC emissions from people "vaccinated" against Covid is an alarming fact that demonstrates a cause-and-effect relationship, Corona2Inspect wrote. Corona2Inspect has made a short video to explain how it is happening and what the possible effects could be. But before you get to the video at the end of this article, a bit of background to the contents of Covid injections as they relate to the MAC phenomenon.
